

GRAPHISOFT
Archicad®

26

STAY FOCUSED, DESIGN MORE.

Stay focused – Design more. With powerful improvements to automated design, documentation and collaboration workflows, and professional out-of-the-box visualization solutions, Archicad 26 lets you focus on what you do best: design great buildings.

DESIGN

Spend less time on project management and more time on design — Archicad 26 helps your team stay organized and files streamlined even as the size and complexity of projects continue to grow.

graphisoft.com/archicad-26#design

“We were able to channel efficiencies from the documentation phase back into design.”

Johnathan Redman, Principal, FJMT, Australia

Faster Project Navigation

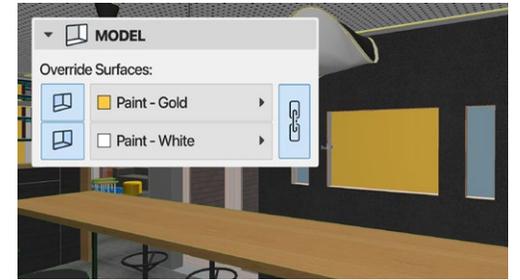

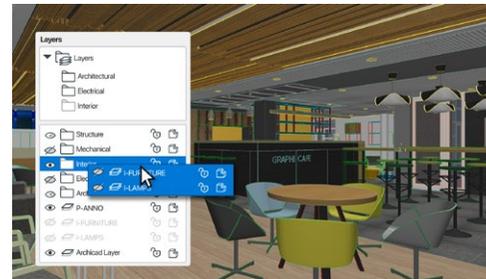

No more endless scrolling! Quickly and easily find specific items with the new Navigator Search for faster navigation inside of a project.

Smart Object Creation with Library Part Maker*

Develop your own parametric object library without scripting! Create doors, windows, and other parametric objects easily with graphical editing methods. The Library Part Maker tool makes object creation a breeze.

Improved Attribute Management

Save time and reduce the risk of errors while you focus on your design — even on large and complex projects. Easier and more intuitive navigation and management of attributes through a structured hierarchy.

Enhanced Surface Overrides

Faster modeling and documentation of openings with fewer workarounds thanks to greater control over openings' surfaces and enhanced Graphic Override options.

Customized kitchen cabinetry

First introduced with Archicad 25, now you can quickly and easily customize the look and style of kitchen cabinetry while still meeting local and company standards and requirements — all without manual workarounds.

New Professional Textures*

Engaging, modern visualizations make client approvals fast and easy thanks to the fresh content added to the Additional Surface Catalog.

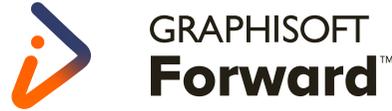

Enhanced BIMx Desktop Viewer

Archicad 26 brings powerful enhancements to the BIMx Desktop Viewer too — more realistic visualization, a simpler, more informative Publisher workflow, and a new customization feature of Archicad's texture export.

* Available for SSA and Graphisoft Forward subscribers only.

What is Graphisoft Forward?

Graphisoft Forward is our global response to the real-world demands of running your building design practice in today's highly competitive environment.

Graphisoft Forward — our global Service and Benefits program — maximizes value and productivity while lowering the overall cost of software through exclusive tools, learning, support, and services. Product updates are included and guarantee that you'll benefit from the latest innovations and capabilities instantly.

VISUALIZE

Faster client approvals — Create stunning visualizations quickly and easily thanks to professional out-of-the-box solutions, modern textures and furniture, and powerful BIMx Desktop Viewer updates.

[graphisoft.com/archicad-26#visualize](https://www.graphisoft.com/archicad-26#visualize)

“Visualization is an imagination that ends up in reality. Archicad is our tool of choice to make that happen.”

Kristine Millar, Principal, Creative Services Leader, Orcutt | Winslow, USA

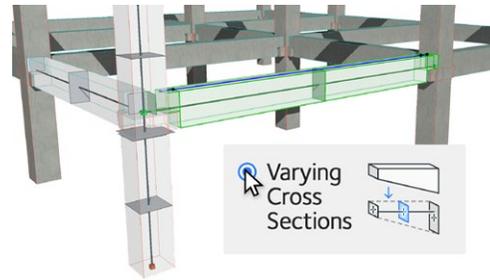

COLLABORATE

Archicad 26 brings improved structural analytical model workflows and usability enhancements for faster, smoother interoperability between architects and structural engineers.

graphisoft.com/archicad-26#collaborate

“BIM with Archicad really changes the way you collaborate. You get more buy-in from everyone on the team.”

Robert Harris, Senior Associate, Pappageorge Haymes, USA

Support for Multi-segmented columns and beams

Get more accurate Structural Analysis calculations with multi-profiled analytical elements that better describe complex segments.

BIMcloud enhancements

No project is too big for BIMcloud, now with an increased file capacity of up to 100K + files. Improvements to security and control over file version history make BIMcloud your best project team collaboration tool.

Faster Export to FRILO

Save time when working with the new Archicad - FRILO one-click direct export feature.

Accurate building energy evaluations

New in Archicad 26 — Get reliable, out-of-the-box energy and CO² building material data for accurate building lifecycle analysis and sustainability reports.

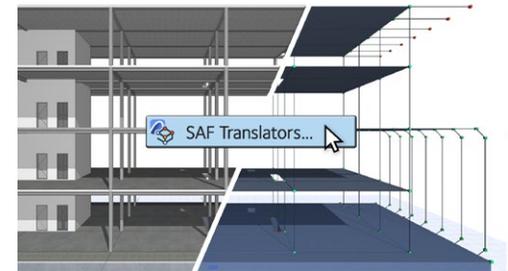

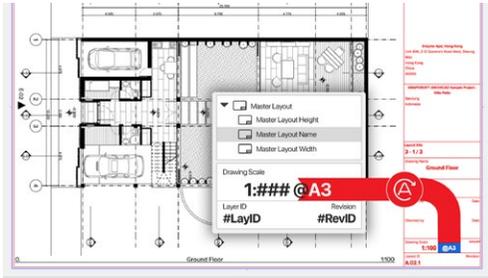

Automatic live Load generation

Faster, automated interoperability between architects and structural engineers in Archicad 26 saves time and increases access to detailed information in the physical model.

SAF Translator Enhancements

Smoother, faster information exchange between Archicad and Structural Analysis applications with the touch of a button keeps architects and structural engineers in sync and on track.

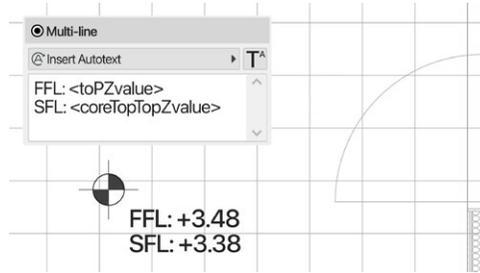

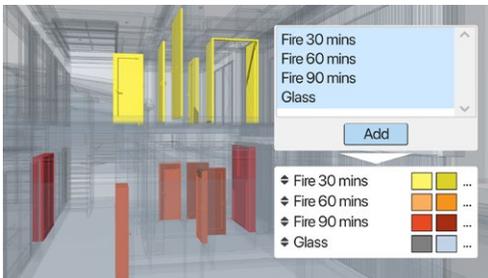

New Autotext for Master Layout

Save time and reduce errors with faster, more accurate documentation thanks to new autotexts in automated layouts.

Graphic Override enhancements

Quickly create Graphic Override combinations — Archicad 26 makes it easy to find and add multiple rules to combinations at once without unnecessary scrolling.

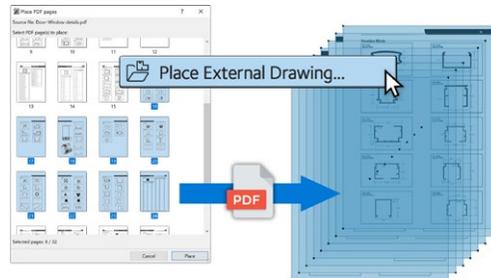

Level Dimensions updates

Another time saver — Documentation is fast and easy when you use the information already available in the model in different ways.

PDF import enhancements

Save time by spending less time on repetitive tasks — Import multiple pages from a PDF with just one click.

DOCUMENT

Archicad 26 introduces faster, more accurate documentation with fewer manual workarounds thanks to powerful enhancements to the documentation workflow.

graphisoft.com/archicad-26#document

“We build a BIM database and from this database we can map many things, including the complete design documentation.”

Gergő Zsidek, BIM Manager, DVM Group, Hungary

LEARN

Learn BIM, your way with Graphisoft Learn
learn.graphisoft.com

GRAPHISOFT
Learn™

Graphisoft Learn is an innovative, modern, and flexible learning program that helps users get the most out of our products and services through individual courses, learning paths, and learning bundles specific to industry roles and responsibilities. Graduates of our online self-paced, hybrid, and live Learn programs receive globally recognized certification, strengthening their competitive edge.

Learn Highlights

Model Authoring Bundle

New to BIM? Kickstart your BIM journey with the Model Authoring bundle. Learn how to model, document, and visualize your design in Archicad. This bundle includes everything you need to know to become a Graphisoft Certified BIM Author. You will understand the entire BIM workflow and will be able to use all Archicad functions and features. This knowledge enables you to work in a collaborative environment using Teamwork and understand all BIM uses of a project file.

Archicad 26 Upgrade Training

Learn about the new features of Archicad 26 in an online self-paced training with the help of a collection of pre-recorded videos and Archicad training files. The material is organized in modules as a complete upgrade course for preparing our users to utilize the most recent improvements in Archicad. Developments related to Design, Visualization, Documentation, Collaboration, and additional improvements are included in this course.

The training is free for SSA/Forward users.
