SOLUTIONS AND SERVICES

Graphisoft empowers teams of building professionals with advanced technology and accompanying know-how to help fulfill your mission: to design and deliver great buildings. We believe that integrating people, workflows, and information in real-time is critical for your success, with our award-winning solutions providing unrivaled open BIM workflows. Our superior Teamwork and mobile solutions help engage all project stakeholders in real-time. Our colleagues, partners, and users work with us in true partnership to change the world for the better by Building Together!

GRAPHISOFT®

SOLUTIONS

Our award-winning solutions support OPEN BIM for workflow transparency, longevity, and data accessibility for built assets.

- **Archicad®**, the architects' BIM software of choice, offers a complete end-to-end design and documentation workflow for architectural and integrated architectural and engineering practices of any size.
- **BIMx®**, the most popular mobile and web BIM app, extends the BIM experience to include all stakeholders in the building design, delivery, and operations lifecycle.
- **BIMcloud®**, the AEC industry's first and most advanced cloud-based team collaboration solution, makes real-time collaboration possible across the globe regardless of the size of the project and the speed or quality of the team members' network connection.
- **DDScad** solutions support users with intelligent Mechanical, Electrical, Plumbing (MEP) design tools, integrated calculations, and comprehensive documentation of all building system disciplines.

SERVICES

Our complementary service offerings are designed to help our users maximize their investment in our solutions.

- **Graphisoft Forward** is a robust Software Services Agreement — our global response to the real-world demands of running a building design practice today. Product updates are included and guarantee that you'll benefit from the latest innovations and capabilities instantly.
- **Graphisoft Learn** is an innovative, modern, and flexible learning program that helps users get the most out of our solutions and services through individual courses, learning paths, and learning bundles specific to industry roles and responsibilities.
- **Graphisoft Community** makes it fast and easy for Archicad, BIMcloud, BIMx, and DDScad users to share solutions and get expert help through a state-of-the-art, user-friendly experience and an easy-to-search resource.

GRAPHISOFT Archicad®

Design and deliver great buildings

Design and deliver projects of any size with Archicad's powerful built-in tools and user-friendly interface that make it the most efficient and intuitive BIM software on the market. Our award-winning software solution supports OPEN BIM for workflow transparency, longevity, and data accessibility for built assets. Featuring out-of-the-box design documentation, one-click publishing, photo-realistic rendering, and best-in-class analysis, Archicad lets you focus on what you do best: create great architecture.

Discover Archicad: graphisoft.com/archicad

Design

Unleash your creativity with the leading BIM software developed by architects like you. With algorithmic design tools and large model support, you can do what you do best: design great architecture.

Visualize

Archicad's professional visualization tools translate your conceptual designs into compelling imagery of future buildings. Bring your models to life, inspire the audience, and invite stakeholders to engage with your designs.

Collaborate

Work with your team and other disciplines around the world or around the corner on projects of any size and complexity. Open standards and workflows mean collaboration is guaranteed — regardless of what software team members are using.

Document

Complete, out-of-the-box documentation tools combined with a powerful publishing workflow that complies with local BIM requirements means you can focus on your designs, not the paperwork.

Try Archicad: graphisoft.com/downloads

"Thanks to Archicad's technical solutions, we can let our architects focus on design."

GRAPHISOFT
BIMcloud®

Great architecture starts with collaboration

Get secure, real-time multi-disciplinary collaboration between all project team members regardless of the size or complexity of the project, the location of the offices, or the speed of the internet connection. Available in both private and public cloud configurations on standard hardware. With BIMcloud SaaS even smaller offices can take advantage of fast, efficient, and secure access to shared projects in real time.

Discover BIMcloud: graphisoft.com/bimcloud

Work hybrid

BIMcloud Software as a Service enables real-time, secure teamwork between architects and other professionals in the cloud. With your BIMcloud Software as a Service subscription, you get access to your own BIMcloud server hosted by Graphisoft on the Google Cloud Platform. No IT setup is required – just launch the service and get ready to share your Teamwork projects in the cloud

Learn more: workfromhome.graphisoft.com

Collaborate

Work in teams just as fast and efficiently on the road as you would at the office, regardless of the size and location of your team or the complexity of the project.

Assurance

BIMcloud keeps your data safe with multi-level backups and a preemptive monitoring and warning system. And security is guaranteed even when collaborating over the internet.

"Teamwork made us really excited about the prospect of what it meant for us as an organization."

Craig Baudin - Director – Fender Katsalidis, Australia

COMPARE

BIMcloud Basic

Free collaboration solution with the most essential features for in-office teamworking for the design teams. Download BIMcloud Basic and start working together on your design projects!

BIMcloud

Multiple smart features elevate teamwork to a new level, with smart element reservations, team and project management, and multi-disciplinary collaboration features. BIMx PRO features with integrated messaging included.

BIMcloud Software as a Service

The most flexible teamwork solution available today! BIMcloud SaaS is managed by Graphisoft – there's no need to invest in additional IT solutions. No upfront investment. Hop on, hop off as your projects require it!

GRAPHISOFT
BIMx®

Your 'best anywhere' design and presentation tool

Bridge the gap between the design studio, the client's office, and the construction site with award-winning BIMx, the most popular presentation and collaboration app for desktops, mobile devices, and the internet. BIMx features the 'BIM Hyper-model' – a game-like navigation tool that helps anyone explore the building model and understand project deliverables. Real-time model cut-throughs, in-context measuring, and project markups in the model context make BIMx your 'best anywhere' BIM companion.

Discover BIMx: graphisoft.com/bimx

Explore

Simple, game-like navigation makes BIMx the 'best anywhere' presentation and collaboration tool on the market. Drive the design narrative on the building site for fast, specific client feedback.

Engage

A digital model means no more paper on the building site or at client meetings. All the relevant model data is at your fingertips for easy access and sharing.

Mobilize

Take it anywhere. Run BIMx on any mobile device without special hardware. Review designs and suggest changes on the go — there's no need to head back to the office.

COMPARE

| BIMx Free	BIMx Pro
3D models with Element and Zone data	Unlimited model size***
Fast 2D documentation viewer	Save favorite views and create presentations***
Hyperlink navigation between 2D and 3D	Print documentation from mobile devices***
Cast shadows	Integrate external data through API*

GRAPHISOFT DDScad™

Intelligent planning of building systems

DDScad solutions support users with intelligent Mechanical, Electrical, Plumbing (MEP) design tools, integrated calculations, and comprehensive documentation of all building systems. Design and deliver high-quality MEP projects on time and on budget thanks to DDScad BIM software for engineers and contractors. Our solutions support OPEN BIM for workflow transparency, longevity, and data accessibility for built assets.

Stand-alone solution with no additional software | Modular and scalable | Continuously developed for more than 35 years

Learn more: graphisoft.com/dds-cad

Mooya Fellesbygg, Norway
Hugaas' Corporate Headquarters in Støren, Norway | DDScad

Design

Adopt existing floor plans or BIM designs effortlessly. Plan MEP projects and timber frame buildings quickly and easily with the help of automatic functions and multidisciplinary clash detection.

Calculate

Calculate MEP equipment and timber frame building production data automatically – based on integrated component information and taking local standards and regulations into account.

Visualize

Create high-impact presentations that give customers a realistic view of the interaction between building services and architecture thanks to powerful visualization tools. Collaborate easily on BIM projects.

Document

Create, print, and plot reports, plans, and parts lists directly from the design. Seamlessly transfer parts lists to calculation software and production software for timber frame buildings.

"DDScad makes an important contribution to our services and thus to our entrepreneurial success."
