

GRAPHISOFT
Archicad[®]

CREATE GREAT ARCHITECTURE!

Archicad 24 connects design and delivery teams in a fully 'open' BIMcloud environment, powered by advanced collaboration and communication workflows. Seamless and transparent information exchange builds trust among team members, eliminates model duplication and redundant work between architects and engineers.

DESIGN

Archicad 24 puts architects and structural engineers on the same page with automatically generated analytical models from the BIM model. Built-in model checking and a seamless bi-directional workflow guarantees high-quality designs, saving you time and money. Save the cost of unplanned changes during construction with native MEP modeling and intelligent objects. Bring your interiors to life with brand-new objects and find the perfect piece faster than ever.

**WORK AS
ONE TEAM!**

MERDEKA 118 | FENDER KATSALIDIS | fkaustralia.com

**FOCUS ON YOUR DESIGN,
NOT THE PAPERWORK!**

DOCUMENT

Publish and share documentation sets to different audiences with just one click! Create automation scripts in Archicad and complete command chains using popular scripting languages like Python. 'Out-of-the-box' documentation sets, combined with a powerful publishing workflow that complies with local BIM requirements, means you can focus on your designs, not the paperwork.

EASY, EFFORTLESS COMMUNICATION!

COLLABORATE

Work with teams around the corner or around the world on projects of any size or complexity. Real-time notifications and clear visualization about relevant changes to the model result in accurate and timely decisions. Open standards and workflows mean collaboration is guaranteed regardless of what software team members are using. Save time, avoid mistakes and minimize the risk of data loss thanks to efficient project management built on a shared model hub. Publish your model directly to a shared location in the cloud for safe, secure access.

VISUALIZE

Deliver professional client presentations with Archicad's built-in palette of VR and rendering tools, designed to help anyone understand and navigate the BIM model. Create compelling visuals and real-time photorealistic renderings quickly and easily with Twinmotion. Present your ideas with an intuitive 3D experience on projects of any size with BIMx. Impress your clients with interactive and immersive design presentations!

IMPRESS YOUR CLIENTS!

DESIGN BETTER BUILDINGS!

ANALYZE

Optimize your design and reduce errors by connecting Archicad with best-in-class analysis tools. Shorten design delivery times with seamless bi-directional workflows between architectural design and structural analysis tools. Keep your projects in sync and reduce the risk of using outdated information with full, real-time access to the shared model throughout the design process. Connect your BIM tool with professional energy analysis applications to evaluate your design's carbon footprint.
